

## Developing the next generation of environmental leaders through education, project-based learning and community service.

### Project Green Schools Membership

Students, Educators and Administrators who lead their schools to engage in Environmental and STEM Education, service projects and green initiatives while building resilient communities.

Members receive access to STEM-meets-sustainability content, project ideas, programs and professional education opportunities through monthly newsletters and access to our 12 Pathways to Greening Your School.

### National/International Green Schools Society

A Student Recognition Program that brings honor to environmentally focused students achieving extraordinary impact in schools and communities.

K-12 students are awarded pins and certificates in recognition of their environmental service. Graduating seniors can achieve a stole following implementation of a capstone project.

### National Youth Council

Leadership Council students are difference makers in their schools (grades 5-12) and communities who are invited to participate in important regional, national and world events.

Students are given a seat at the table – with government, corporate and professional green leaders. They create a feedback loop between leaders and the next generation and make connections which help them find their place in higher education and the workforce.

### Green Difference Awards

Recognition, honors and scholarships are awarded annually for Outstanding Environmental Education & STEM efforts led in our schools and communities.

We honor Green Difference Makers made up of Principals, Teachers, Advisors, Students, Citizens, Schools, School Groups/Clubs, and our Sponsors nationally and internationally at our annual event.

## Be a part of developing the next generation of student leaders!

**RIGHT NOW, PROJECT GREEN SCHOOLS IS FOCUSING ON...**

**SCHOOLS** - bring NGSS/IGSS recognition program to your school, class, club, service society, after school club or program of independent study.

**STATES** - expanding our "whole state" model across the USA. By partnering with your state Dept of Ed or state legislature, we can offer membership to every school: public, private & independent. Is your state ready?

**PARTNERS** -making new partnerships with corporations and foundations. Does sponsorship of STEM education and environmental projects align with your values?

## Global Impact

- √ 6,500 schools
- √ 502,100 students
- √ 43 US States and 45 Countries
- √ 25,000 hours of service
- ...and growing!!!

### Project Green Schools and students have participated in events like...

Paris COP21, Summits with the EPA and White House Officials, and helped the Super Bowl create a youth summit.

## 2019 Happenings

UgMO

Scenic America

Ocean Ambassador

Bridges House Sustainability Youth Council & EXPO
