Plymouth, MA 02360

Dear Project Green Schools,

As a recent graduate of Barnstable High School class of 2018, I am so grateful to have been selected as the 2018 recipient of the Energized Future Scholarships sponsored by Current powered by GE and Project Green Schools Scholarship. I apologize for the delay in sending this thank you letter, but as I am sure you can imagine the chaos and stress of the summer of senior year. After making tournament in lacrosse, going to Future Problem Solvers International competition, taking a brief vacation and working I have been over-scheduled, to say the least.

I intend to major in Environmental Science at UMASS Amherst to help prepare me for my future (possibly starting my own Biofuel business). I plan on partaking in a domestic university exchange program my sophomore year and studying abroad my junior year. These exciting opportunities will allow me to expand my horizons and to utilize the world as my classroom as I discover my passions which will ideally decide my concentration within Environmental Science. The abundance of resources, support systems and research opportunities available to UMass Amherst students will prepare me for a career in which I have the potential to be influential while making a positive impact on the planet.

Once again, I cannot express enough what is an honor to be named the recipient of this scholarship and my gratitude for your faith in me as you support my collegiate education.

Sincerely,

Allison Carter, University of Massachusetts Amherst, Class of 2022
